---

## CAREER OBJECTIVE

"Motivated graduate with strong technical skills in data analysis, including data cleaning, transformation, and visualization. Experienced with SQL, Python, and Excel for managing and analyzing data. Completed academic projects where I cleaned and processed large datasets, performed exploratory data analysis (EDA), and created insightful visualizations using Tableau. Eager to bring my passion for data quality and problem-solving to a professional data analytics team.

---

## EDUCATION

### Bachelor of Engineering in Information And Communication Technology

2022-2025

Sal Institute of Technology & Engineering Research  
Ahmedabad

### Diploma in Information Technology

2019-2022

Government Polytechnic  
Ahmedabad

---

## PROJECT DETAILS

### Project title-1 Olympic Athletes Analysis - Data Analysis

- Analyzed Olympic athlete performance data using Python (Pandas, NumPy) to identify key trends and factors influencing success across multiple sports. Developed visualizations and predictive models to forecast medal outcomes, and created an interactive dashboard to present insights.

### Project title-2 Green Growth - An Android Application

- The application has been made to make farmers digitally aware about the crop fertility their nutrition's. Implemented features to analyze soil composition using data input by farmers, utilizing machine learning algorithms to provide accurate crop recommendations Language like JAVA, database in Firebase were used in project.

### Project title-3 Clinic's Management System - Website

- Website build with PHP and Mysql for small local clinics management. Keeping records of prescription and patient records digitally.
-

## PROFESSIONAL EXPERIENCE

### Internship - InfiVidhya Pvt Ltd

June 2024 - July 2024

- Completed a 2-week data science internship, where I gained hands-on experience in data analysis, visualization, and predictive modeling using Python. Worked with libraries like Pandas, NumPy, Matplotlib, and Seaborn to clean and analyze datasets, and created visual reports to present insights effectively.

### Internship - IBMSkillsBuild in Data science

July 2024 - oct 2024

- CSR BOX Collaboration with IBM SkillsBuild, Data Analyst intern Completed a Data Analyst internship, where I analyzed large datasets, performed data cleaning, and developed insightful visualizations using tools like Excel, SQL, and Python (Pandas, Matplotlib). Presented data-driven insights to support business decisions and improve operational efficiency.

### Volunteer - Sal Institute of technology & Engineering Research

- content leader of college event - PANACHE 2023-24

---

## TECHNICAL LEARNING

Programming Language: C, C++, JAVA, Python

Frontend Development: HTML, CSS

Backend Development: C++, Java, Python

Database: Firebase, SOL

Tools: Android studio, Visual studio code, Tableau, PowerBI, Google colab
